EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Henry Query on 11/17/05.

The application has been amended as follows:

In the claims:

- In claim 8, lines 1-3 have been replaced with --In combination with a horizontal Christmas tree comprising a generally vertical production bore, the improvement comprising: a first production outlet which includes a first end that is connected to the production bore and a second end that extends away from the production bore; and at least second and third production outlets which each extend from the second end of the first production outlet.--
- In claim 9, line 2, the recitation of "each production outlet has" has been replaced with --the second and third production outlets each have--
- Claim 10 has been cancelled.
- In claim 11, line 1, the recitation of "claim 10" has been replaced with --claim 9--, and in line 2 the recitation of --second and third production-- has been added between "the" and "outlets".

Art Unit: 3672

- In claim 12, line 2, the recitation of “outlet” has been replaced with --of the second and third production outlets--.
- In claim 13, line 2, the recitation of “production outlet” has been replaced with --of the second and third production outlets--.

2. The following is an examiner’s statement of reasons for allowance: In Figure 10 of US 5,544,707 to Hopper et al, there are shown multiple production outlets 53A and 53B that are connected to the production bore in a horizontal Christmas tree, which clearly anticipated previously submitted claim 8. Therefore, the aforementioned amendments to claim 8 were proposed to show that there are at least three distinct production outlets, at least two of which each extend from the second end of the first outlet. The prior art of record, either alone or in combination, fails to teach or suggest the at least two production outlets which each extend from the second end of the first outlet, as is currently claimed in combination with a horizontal Christmas tree.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
